## Background

The global children's welfare sector faces immense challenges, with billions of children living in poverty, disease, and difficult environments. Traditional charitable organizations play an indispensable role in alleviating these problems. However, the opaque practices of some organizations have raised doubts among charitable donors.

### **Opaque Practices of Traditional Charities:**

The flow of funds in these organizations is often opaque, and donors cannot clearly understand how their donations are being used or whether they are directly benefiting charitable projects. High management fees and administrative expenses also raise public scrutiny because these costs consume a significant portion of donations, resulting in less effective utilization of funds. Additionally, charitable activities of traditional charities are often controlled by a group of managers, which may lead to preferences for specific projects or regions while overlooking other potential needs.

### **Advantages of Decentralized Charity:**

Compared to traditional charitable organizations, decentralized charity leverages the characteristics of blockchain technology to provide donors with a more transparent, efficient, and fair donation experience. All donation transactions are recorded on an immutable blockchain, allowing donors to track the flow of funds and ensure that donations are used for committed charitable projects. The decentralized structure eliminates intermediaries, reducing management fees and administrative expenses, enabling more donations to be directly allocated to charitable causes, thus enhancing the efficiency of fund utilization. Moreover, decentralized charity adopts a community governance model, allowing token holders to collectively decide how donations are used, ensuring fairness and democracy in donations and making it more likely to meet diverse charitable needs.

The issuance of the Childrens Aid Foundation token is based on a reflection of the opaque practices of traditional charitable organizations and recognition of the advantages of decentralized charity. By leveraging blockchain technology and smart contracts, we will ensure transparent use of donations and maximize social benefits, striving for the welfare of children worldwide.

# Token Economic Model

The economic model of the Children's Aid Foundation token is designed to ensure liquidity, sustainability, and long-term support for child welfare initiatives. Leveraging the characteristics of blockchain technology, the model incorporates mechanisms such as transaction taxes, token burning, and liquidity rewards to ensure stable token value and incentivize community participation.

## 1. Initial Supply:

The total token supply is 2 billion, symbolizing the global child population, reflecting Children's Aid Foundation's commitment and concern for child welfare.

## 2. Transaction Taxes:

A 5% transaction tax is levied on each transaction. 2% is allocated to project operations and donations, 1% is for token burning, 1% flows back to the liquidity pool, and the remaining 1% is distributed in USDT to LP token holders of the CAF/WBNB trading pair. These tax revenues will support child welfare initiatives, enhance token liquidity, and incentivize community participation.

## 3. Token Burning:

The mechanism of burning a portion of tokens not only acts as a deflationary measure but also symbolizes our desire to reduce the number of children in need. 1% of tokens from each transaction are burned, gradually reducing the token supply and increasing token value.

## 4. Liquidity Rewards:

1% of each transaction flows back into the liquidity pool to increase token liquidity, improve transaction efficiency and speed. Additionally, users holding LP tokens of the CAF/WBNB trading pair receive automatic USDT dividends, further incentivizing community participation and holding.

## 5. Token Lockup Release Plan:

200,000,00 CAF will be unlocked and released to GATE exchange on 2024-04-01.

200,000,00 CAF will be unlocked and released to OKX exchange on 2024-06-01.

200,000,00 CAF will be unlocked and released to KUCOIN exchange on 2024-08-01.

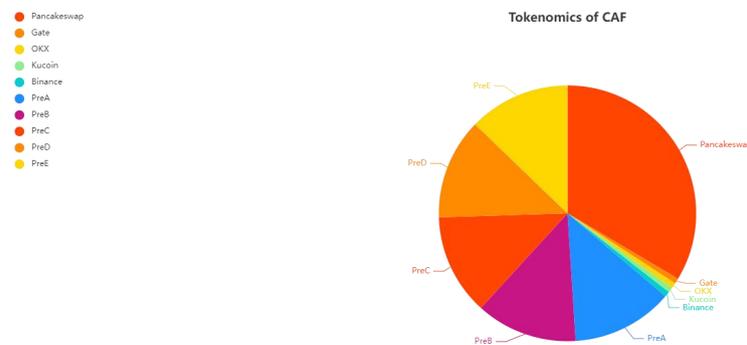

200,000,00 CAF will be unlocked and released to BINANCE exchange on 2024-10-01.

200,000,00 CAF will be unlocked and released to COINBASE exchange on 2024-12-01.

The 180,000,000 CAF tokens will be allocated for rounds A, B, C, D, and E of public sales. The public sale price will be set at 95% of the unlocked token price at the time of each round. Payment for the public sale will be accepted in USDT. The public sale will last for 30 days after the unlocking of each round, with no limit on the amount per address. If any portion of the CAF tokens remains unsold after each round of public sale, the remaining tokens will continue to be locked for an additional two months.

## 6. Token Distribution Model:

50% of the Children's Aid Foundation tokens will be added to PancakeSwap liquidity, while the remaining 50% will be locked. Every two months, 20 million CAF tokens will be released to exchanges to provide basic liquidity. The remaining 180 million CAF tokens will be distributed in five rounds of public sales (ABCDE).

With the design of the above economic model, the Children's Aid Foundation token will maintain stable value and liquidity while providing continuous financial support for child welfare initiatives. Token transactions will directly benefit child welfare causes, creating more hope and possibilities for the future of children worldwide.

## Mission and Vision

The Childrens Aid Foundation aims to be a solid pillar for global children's welfare, leveraging the power of blockchain technology and the cryptocurrency community to provide better living conditions and support for the 2 billion children worldwide. Our mission is to create a brighter future for children through sustainable development and innovative models. Our vision is to establish a society full of love and care, where every child can enjoy a healthy, happy, and safe environment to grow up in.

In pursuit of our mission and vision, we will take the following specific actions:

**1. Provide comprehensive support and assistance:**

We will collaborate with global children's charities and individual children or families in need to provide comprehensive support and assistance. Whether it's education, healthcare, or basic life needs, we will do our utmost to help them overcome difficulties and embrace a better future.

**2. Promote social responsibility and philanthropy:**

We will actively advocate for social responsibility and philanthropy, encouraging more people to pay attention to children's welfare and actively participate. We believe that true progress can only be achieved when the entire society engages in children's welfare.

**3. Drive innovation and collaboration:**

We will continuously explore innovative models and seek more effective solutions. We will collaborate with various parties to jointly promote the development of children's welfare and work together to create a better future for children.

**4. Advocate for education and awareness-raising:**

We will advocate for children's education and awareness-raising, helping children develop the right outlook on life and values. We believe that through education and awareness-raising, we can open up broader futures for children and help them become the backbone of society.

**5. Maintain continuous monitoring and tracking:**

We will continuously monitor the living conditions of children and track the progress and effectiveness of our aid projects. We will regularly disclose donation information to ensure transparent use of funds and maximize social benefits.

The Childrens Aid Foundation is dedicated to the well-being of the 2 billion children globally. We believe that through our collective efforts, we can create a brighter future for children, filling every corner with love and hope.

## **Donation Targets**

The donation targets of the Childrens Aid Foundation are not limited to traditional children's charities but encompass various children's welfare organizations as well as individuals or families in need. We recognize the diverse range of challenges faced by children worldwide, and therefore,

we are committed to directing aid funds to where they are most needed, maximizing the effectiveness and impact of our assistance.

Our donation targets include but are not limited to:

**1. Basic education support:**

Providing educational resources, learning facilities, and opportunities to children in impoverished areas, helping them access quality education and break the cycle of poverty.

**2. Medical assistance:**

Providing medical aid and treatment support to sick or injured children, ensuring they receive timely and effective medical care to regain health and vitality.

**3. Nutritional support:**

Providing food and nutritional supplements to malnourished or hungry children, ensuring they receive adequate nutrition for healthy growth.

**4. Disaster relief:**

Providing emergency relief and psychological support to children affected by natural disasters, wars, and emergencies, helping them overcome adversity and rebuild their lives.

**5. Social integration support:**

Providing shelter and social integration support to disabled children, orphans, and street children, allowing them to feel the warmth and care of society, regain confidence and hope.

**6. Cultural and recreational activities:**

Providing children with opportunities for cultural, artistic, and recreational activities to enrich their life experiences and stimulate their creativity and imagination.

We will ensure the maximized utilization of donation funds and maximize social benefits through collaboration with children's charities, NGOs, and community groups worldwide. We commit to using donated funds to directly and effectively help children in need, creating a better future for them. Additionally, we will regularly disclose donation information to ensure transparency and openness in fund utilization, allowing donors and the general public to confidently support our cause.

## Future Outlook

The Childrens Aid Foundation looks to the future with a commitment to continuously drive the development of children's welfare and actively explore more cooperation opportunities and innovative models. We firmly believe that only through continuous innovation and progress can we create a better future for children.

### **1. Global Expansion and Increased Influence:**

We will actively expand partnerships, broaden project coverage, and extend the impact of aid to more regions and more children. Through collaboration with international organizations, government agencies, and businesses, we will achieve global coverage of children's welfare, providing assistance and support to more children.

### **2. Technological Innovation and Social Responsibility:**

We will continuously explore the application of blockchain technology in children's welfare, promoting the integration of technological innovation and social responsibility. Through techniques such as digital identity authentication, smart contracts, and blockchain data analysis, we will enhance the transparency and efficiency of aid projects, ensuring the maximized utilization of aid funds.

### **3. Education and Awareness-raising:**

We will focus on education and awareness-raising efforts to increase society's attention and awareness of children's welfare. Through organizing educational activities, media campaigns, and social networking channels, we will promote the concept of caring for children and encourage more people to actively participate in children's welfare.

### **4. Sustainable Development and Social Impact:**

We will advocate for the concept of sustainable development and integrate social responsibility into the entire process of corporate development. Through promoting social enterprises, sustainable investments, and philanthropic entrepreneurship, we will continually expand social impact and drive sustainable development in society.

### **5. Collaboration and Win-Win:**

We will adhere to the principle of cooperation and mutual benefit, working with all parties to promote the development of children's welfare. Whether it's government agencies, businesses, or non-profit organizations, we are willing to collaborate with them to work together for the future of children.

The Childrens Aid Foundation believes that with our joint efforts, we can create a brighter future for children. Let us stand together, shoulder to shoulder, and strive for the welfare of children, ensuring that love and hope accompany them as they grow!

## Conclusion

The issuance of Children's Aid Foundation tokens marks a significant breakthrough and innovation in global child welfare. We believe that leveraging blockchain technology and decentralized mechanisms can inject new vitality and hope into child welfare, creating a brighter future for the world's 2 billion children.

Throughout our journey, we have deeply understood the shortcomings of traditional charitable organizations and the immense advantages of decentralized charity. We are committed to breaking the opacity of traditional charitable organizations, ensuring transparent, efficient, and fair use of donations. We also hope to involve more people in charitable activities through community governance, jointly deciding on the use of donations to meet diverse charitable needs.

Children's Aid Foundation tokens are not just a digital asset, but also a reflection of our commitment and belief in child welfare. We will continue to collaborate with child charity organizations and NGOs worldwide, striving for the well-being of children. We believe that with our collective efforts, we can create a future full of love and hope for every child.

Let us stand together, shoulder to shoulder, and strive for the welfare of children, ensuring that love and care accompany them as they grow. Children's Aid Foundation, let us take action and contribute to the future of children!
